

Go **EXTRA** Green with **PLASTIC**

Did You Know ?

- Plastic requires **less energy** to produce and recycle, than paper or non-woven alternatives
- Plastic creates an eco-friendly **recycling** chain
- Plastic is more **cost-effective** for your business from production through delivery
- Plastic contributes to a **greener chain of supply**

 **Recycle** – Extra Plastic’s flexible plastic products can be made from post industrial and post consumer materials.

 **Reuse** – Extra Plastic’s quality flexible plastic retail and carrier bags offer attractive design and printing options making them appealing for consumers to reuse after the original purchase. Your private label bags will live on for lunch, gym and errand bags.

 **Renew** – Extra Plastic’s bags don’t have to end up as waste. They are recycled to create hybrid building materials, such as composite lumber, window casings and decking and also return to the plastic industry as raw materials.

Extra Plastic pioneers and implements innovative technologies to provide eco-friendly, recyclable plastic products and solutions for your business. From manufacturing through delivery we stand by our commitment to the environment. All our films and bags are available from recycled and degradable plastic upon request.

Enjoy the **BENEFITS** of recycling with our **Retail & Carrier Bags**

The simplest way to recycle is to reuse

Recycling is at the core of our manufacturing flexible plastic packaging cycle. From manufacturing through consumption and disposal – plastic bags are constantly recycled into new bags and other useful products.

Profit from **ADVANTAGES** of fuel & cost efficiency with our **Mailer, Shipper and Courier Bags**

Save on production, storage and delivery expenses

- 2 in 1 packaging, ship and return in one convenient packaging solution.
- Manufacturing, storage and shipping costs are lower for plastic mailer, shipper & courier bags than for corrugated boxes.
- Plastic mailer, shipper and courier bags are compact and take up less space, therefore reducing storage and transportation expenses.

Did You Know?

Plastic vs. Paper

- **Production:** Plastic vs. Paper
50% less GHG emissions
70% less energy consumption
80% less waste
- **Consumption:**
More than 90% of consumers reuse plastic bags
- **Recycle:**
It takes over 90% less energy to recycle a pound of plastic than a pound of paper. Request recycled plastic in your bags.
- **Disposal:**
Plastic with degradable additives can disintegrate completely in composting facilities.

Recycled & Degradable Plastic

Reducing our Imprint on the Environment

Extra Plastic is committed to environmental awareness applied through innovative technologies that give our customers an advantage in their market position.

We have decades of experience manufacturing our flexible plastic products with recycled plastic and degradable additives, for all our products catering to industrial, retail and food markets. We use the highest grade of recycled & degradable additives to ensure you receive a completely environmentally friendly product. All our recycled and degradable products are printable.

Learn more about our in-house recycling facility.

Degradable and Compostable Retail Bags, Mailers & Courier Bags

We use degradable additives that are completely compostable in suitable facilities and waste dumps.

Keeping ahead of the industry, we have introduced new compostable Bio-Plastic film and bags made from organic sources. This innovative non-fuel polymer can decompose in only 90 days.

Certifications: We are certified by various producers of degradable additives to utilize their materials in our packaging products and mark them with the appropriate industry icons.

About Us

Extra Plastic is a public company operating in the flexible packaging market since 1960.

Our global market presence makes us easy to reach: We offer unparalleled door-to-door service that relieves our customers from any customs or logistics concerns.

In the USA we also offer warehousing and distribution services with an advanced tracking and updating system.

Extra Plastic operates under the highest industry standards, maintaining the standards and certifications of: ISO-9001, BRC and HACCP for food packaging.

We are approved by ICAO as manufacturers of duty free STEB bags and by the Federal Reserve Bank of the United States for security envelopes and deposit bags.

Extra Plastic has long been committed to sustainability and an eco-friendly environment introducing innovative technologies to encourage our customers to choose eco-friendly solutions.
